

PCC Alumni Portal

Alumni Career Tracking & Networking Portal · Pagadian Capitol College, Inc. **Version:** 0.0.1 (Frontend Prototype) **Stack:** React · Vite · Tailwind · React Router **Run:** npm install → npm run dev → localhost:5173

PROJECT SUMMARY

A web-based alumni networking and career tracking system with two roles: **Alumni** (profile, directory, career timeline, announcements) and **Admin** (dashboard, manage alumni, announcements, reports, users). The UI and navigation are largely complete; backend, database, and real authentication are not yet implemented.

HOW IT WAS BUILT

- Phase 1:** Requirements & Figma design tokens (brand colors, typography)
- Phase 2:** Vite + React setup, routing, Tailwind styling
- Phase 3:** Auth screens (Login, Register, Forgot Password) — UI only
- Phase 4:** MainLayout — creative alumni shell + classic admin sidebar
- Phase 5:** Alumni pages (dashboard, profile, career, directory, news)
- Phase 6:** Admin pages (dashboard, CRUD tables, charts, reports)
- Phase 7:** Mock data in `src/app/data.ts`
- Phase 8:** UI polish — networking design, profile sketch layout, edit modal, nav fixes

WHAT IS WORKING

- Full routing for alumni & admin modules
- Role switch (Alumni → Admin) and logout
- Alumni dashboard, directory search/filter, announcements
- Creative profile page + edit profile modal (blur overlay)
- Career form UI + employment timeline display
- Admin stats, charts (Recharts), announcement CRUD (session only)
- Responsive layout (desktop nav + mobile bottom bar)
- Production build: `npm run build`

MODULE MAP

Alumni Routes	Admin Routes	Status
/alumni/dashboard — Home hub	/admin/dashboard — Stats & charts	UI complete
/alumni/profile — Creative profile + edit modal	/admin/alumni — Manage alumni table	UI only
/alumni/career — Employment timeline	/admin/announcements — CRUD announcements	Session memory
/alumni/directory — Search & filter alumni	/admin/reports — Charts & export UI	Partial / mock data
/alumni/announcements — News feed	/admin/users — User management	UI complete
Auth: / (login) · /register · /forgot-password		No backend

DEMO FLOW (PRESENTATION)

Login as **Alumni** → Dashboard → Directory (search) → Profile (creative layout) → Edit modal → Career → Announcements → SU menu → **Switch to Admin** → Dashboard charts → Manage Announcements (create one) → Logout. *Note: Admin changes and form saves reset on page refresh until a backend is added.*

ARCHITECTURE (CURRENT)

- Frontend SPA** — React Router for all pages
- Data layer** — static mock arrays + page-level useState
- Auth** — simulated login (1.2s delay, no validation)
- Backend / API / DB** — not connected

#1a3a6b Navy

#2d5a9e Blue

#FF8A3D Orange

#F5C518 Yellow

#F5F0E8 Cream

WHAT STILL NEEDS WORK

- Real authentication & protected routes
- Database + REST/API for all CRUD operations
- Persist profile, career, and admin changes (currently lost on refresh)
- Profile photo upload & file storage
- Email flows (register, forgot password)
- Export PDF/Excel on reports (buttons are UI only)
- Sync charts with live data; wire admin action buttons
- Official PCC logo asset; deployment to production hosting

Overall status: Functional frontend prototype (~65% of full capstone if backend is required) PCC Alumni Portal · Capstone Documentation
